

**UNCOVER
INFORMATION
ON THE GO**

WHAT IS FIRSTLight?

FIRSTLight is the one-stop-shop for medicines information:

How, when and when not to use a medication - ingredients, indications, doses, routes and administration advice

When to avoid using a medication - information about allergies and safety of use with other concurrent conditions, drugs and food

Tests, measures and observations required while using a medication including what should be done about any resulting changes, along with information about managing expected side effects and what to do in cases of over-dosage

Reproduction, pregnancy and breastfeeding advice including whether taking the medication can affect fertility, relevant recommendations for use of contraception and any risks associated with pregnancy or breastfeeding while taking the medication

3 REASONS TO START USING **FIRSTLight...**

FIRSTLight

1. IT'S ACCESSIBLE

- Use FIRSTLight at your desk or on the move with the iPhone and iPad apps
- Available at any point in your workflow
- Simple and affordable annual subscription

FIRSTLight for **individuals:**

Low-cost licences – for individuals, multiple users and students

Instant data – a wealth of reliable and up-to-date medicines information updated monthly

Easy to use - with configurable search and navigation functions

2. IT'S INNOVATIVE

- Content specifically designed for electronic display and built to support real-life clinical scenarios
- Modern and intuitive user interface with powerful search functionality
- Configure FIRSTLight search and navigation to suit your needs

FIRSTLight for **organisations:**

Accessible at any point in staff workflows – FIRSTLight can be launched from staff desktops with no log-in required

Supports a wide range of clinical scenarios - all staff can view a single source of reliable and up-to-date medicines information

Cost savings for departments and organisations - FIRSTLight licenses available by size and type of organisation

3. IT'S TRUSTED

- Backed by over 30 years' experience of medicines knowledge bases and clinical decision support
- Researched and authored by First Databank's (FDB™) team of clinical informatics specialists
- Accredited to ISO 9000:2008 and compliant with national clinical and IT guidance

FIRSTLight for **partners:**

Access from your current clinical system - FIRSTLight can be embedded within existing clinical systems with minimal development work required

Added value for end users - medicines information available any time they choose, not just at the point of prescribing

Simplicity for all - FIRSTLight can be launched with drug 'in focus', making the process slicker for your end users
